

“The Tongtai Horizontal is built for heavy-duty work, and wow is fast! Absolute’s support is outstanding.”

Gary Heller, Owner - G.L. Heller Co., Whitehouse, OH

When Gary and Todd Heller explored the benefits of machining their parts horizontally, they compared several machine tool brands. They bought a Tongtai HB-630 630 mm pallet machine. Then they bought a HA-400II 400 mm pallet machine. All they knew at first was that Tongtai used to build Hitachi Seiki machines and that Absolute Machine Tools was a highly reliable service provider. In short order, they experienced Tongtai’s quality construction, quick travels and pallet changes, tool changes that are 5 times faster than most other machines in its class, superb chip removal, and so much more – all backed by the integrity of Absolute Machine Tools.

HA-400 II / 500II
40 Taper Spindles

HB-500/630/800
50 Taper Spindles

Outstanding STANDARD Features:

- Full B Axis
