Feature Spotlight: M-800iA/60

The M-800iA/60's outstanding path accuracy for high accuracy path applications allows manufacturers to significantly improve the quality of laser cutting, welding, or in general processes with a very high demand on accuracy.

Thanks to the high rigid and robust construction, the M-800iA/60 offers great performance regarding accuracy. Its great motion performance especially in narrow corners makes it ideally suited for high accuracy path applications like 3D laser cutting.
